I dedicate my work to web application development with a strong focus on creating high-quality digital products.

Experience

Fullstack Developer · **GlobalTech** ↗ April — September 2023

- I collaborated on a development team to enhance a web product. My role included UI development and the implementation of key features. Additionally, I played an active role in testing and documentation processes to ensure code quality and robustness.
- I worked closely with other developers in researching, developing, and architecting technical solutions that not only met business requirements but also improved efficiency and user experience.
- I facilitated the creation of technical documentation, resulting in increased cohesion and effectiveness in the development process.

Semi Senior Frontend Developer · **GymRevenue** ↗ January — April 2023

- I participated in the development of an interactive web application. My contributions included turning designs into functional code and ongoing application improvement. I fostered collaboration with my coworkers, contributing to mutual growth and our team's success.
- I maintained a constant focus on the continuous improvement of the application, which involved optimizing its performance, usability, and user experience.
- I translated complex designs into functional and stylized code, ensuring that the creative vision was faithfully reflected in the user experience.

PHP Developer · **Aconpy** ↗ July — December 2022

- At Aconpy, I was part of a development team that built web applications. My focus was on delivering high-quality code and collaborating effectively as a team. I also actively participated in testing processes to ensure software reliability.
- I collaborated closely with designers and other developers to ensure consistent and well-thought-out user experiences on both mobile devices and desktop computers.

Fullstack Web Developer · **Freelancer** June 2021 — June 2022

- As a Freelance Developer, I worked on various web projects, focusing on translating designs into code and improving the user experience. I collaborated with other professionals on system and website design.
- I developed, maintained, and delivered production code for client websites, primarily using Javascript, Vue.js, PHP, Laravel, and Tailwind CSS.
- I conducted performance testing on various sites to ensure cross-browser compatibility and mobile responsiveness.

Software Architect · **Focomotor** ↗ March 2018 — June 2021

- I led the web product and worked in a team with other engineers to develop, maintain, and document the web product. I actively participated in the engineering process and ongoing improvement of key features.
- I collaborated with designers, project managers, and other engineers to turn creative concepts into production realities for clients and stakeholders.
- I provided leadership within the development department through close collaboration, knowledge sharing, and mentoring.

Skills

Programming Languages

JavaScript ES6, PHP, SQL, Transact-SQL, HTML, CSS, Sass

Libraries & Frameworks

Vue, Nuxt.js, Node.js, Laravel, Composer, Codeigniter, Tailwind CSS, jQuery

Tools & Platforms

Git, Github, Oracle Cloud, WordPress, Firebase, Scriptcase

Education

Technician in Informatics
EESTN2 Olavarria

Professional Informatics Technician with experience in the design and programming of computer systems, capable of developing technological solutions and effectively tackling computer challenges.

Courses

Laravel: From Zero to Expert ↗

Javascript ES6: The Complete Guide ↗

Intermediate PHP Course ↗

Mastering Git - Version Control System ↗

YoPrograma: Javascript ES6 and Object-Oriented Programming ↗

SQL - Complete Database Course ↗

HTML and CSS - Web Design Course ↗

Interests

Run to stay active, explore new technologies, and learn languages to enrich my global perspective.
